With premium power line ZGEAR®, NWE Brands is here to supply you with the ever-changing trends in wireless; including our new, Magnetic Align products that make fast charging a “snap,” and USB-C charging technologies that provide the fastest speeds available to a wide range of wireless household electronics. ZGEAR® products have adhered to a strict quality standard since development in the 1990’s (then, as Northwest Electronics) and today, we supply retailers nationwide with the latest technologies and accessory solutions that last. Never lose power with our charging products that are built for lasting use and support top market speeds better, and for longer than the competition.

Our attention to exceptional service is reflected in our **True Supplier Partner** philosophy. In us, you will find a dedicated vendor partner, engaging in sustainable

practices, whose values extend throughout the people, product and processes we apply.

We work hard to ensure our products exceed the expectations of our diverse customer and end user base and we are proud to offer a business proposition that continues to drive mutual success.

Consumers are actively seeking safe and dependable products in the wireless accessories space. Provide them with our wide range of options today — you will be pleased with our True Supplier Partner pricing and profits.

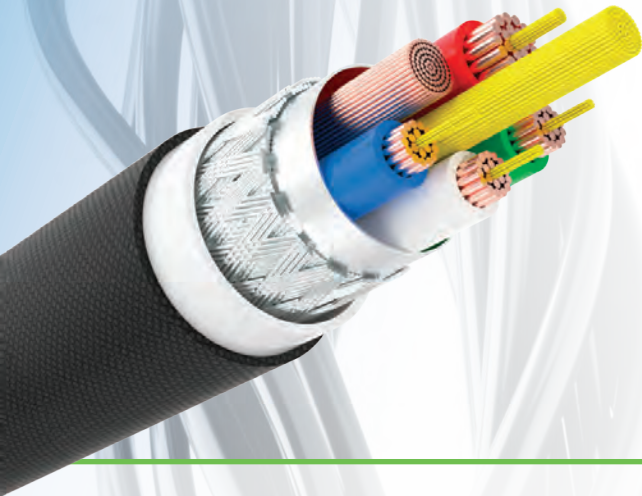

With confidence we offer a One Year Warranty on our Products

SYNC & CHARGE

ENDURATECH™

EnduraTech™ Aramid strands increase toughness and protection, can withstand over 160 lbs of force and shields cable from heat. With this increased durability, they can withstand over 100,000 plus bends at 90°

EnduraTech™ cables are comprised of:

- Aramid Reinforcing Fibers
- PVC Wire Shielding
- Grounding Drain Wire
- Aluminum Foil Shield
- Wire Mesh Layer Absorbs Magnetic Interference
- TPE Protective Sheath
- Double-Braided Nylon Jacket

10 Foot Braided Cables Featuring EnduraTech™

- Tangle resistant braided cable jacket and aluminum plugs make this cable incredibly strong and long-lasting.
- 10 foot cable length allows you freedom to move wherever you like, while keeping your device connected to a powerful charge.
- Cable enables transfer and synchronization of data such as music, photos, videos and more.
- Supports 15 Watts (3 Amps) of power for fast charging.
- Charge your smart phone, tablet, or other personal devices.

| TYPE | COLOR | HOUSING | MODEL |

8 Foot 90° Braided Cables Featuring EnduraTech™

- Tangle resistant braided cable jacket and aluminum plugs make this cable incredibly strong and long-lasting.
- Supports 15 Watts (3 Amps) of power for fast charging.
- 8 foot cable length offers freedom to connect to a powerful charge from a distance. 90° angled attachment offers additional stress relief for use from relaxed positions.
- Cable enables transfer and synchronization of data such as music, photos, videos and more.
- Charge your smart phone, tablet, or other personal devices.

POWER DELIVERY

When paired with a Power Delivery compatible Wall Charger, Car Charger or Power Bank, a “handshake” occurs between USB-C cables and the respective charging device. Power Delivery chargers are equipped with a special chip that puts a read on each connected device, and supplies it with the most optimal power speeds possible. Power Delivery is understood to be the fastest, and safest in new charging technologies.

Pair our Fast Charge USB-C cables with Power Delivery Wall (p12-14) and Car Chargers (p6-7) to offer the latest and greatest in high-demand power solutions.

WATCH OUR
VIDEOS ABOUT
FAST CHARGING

5 Ways Consumers Make The Most of Power Delivery

1. **A Full Charge On-The-Go.** Heading out for a night with friends? In the time it takes to get ready, or while heading over during the drive, Power Delivery will supply smart phones with a full charge; backing them with enough power to last any festivities.
2. **Keep The Conversations Flowing.** No one likes being tethered to a wall charger during phone calls or video chats. Even while in use, Power Delivery chargers provide enough juice in a short period of time to unplug and resume sweet, wireless freedom.
3. **Don't Stop The Music!** Power Delivery speeds work in conjunction with USB-C or Lightning ports on wireless earbuds or speakers, so audiophiles can keep quiet time to a minimum.
4. **No Computer Charger, No Problem.** The latest Apple® Macbooks have moved from MagSafe, to USB-C for computer charging. The same Power Delivery set up for smart phones and other devices can serve as an impromptu laptop charger, saving headaches from a dead computer situation.
5. **Superior Safety.** Given that the Power Delivery chip reads and responds to a device's individual requirements, there is integrated overcurrent protection. Power Delivery chargers are also built to meet premium quality standards for added security.

Charge Faster

With Power Deliver (PD) or QuickCharge (QC) your device will charge up to 4x faster. Many of our products have one or both of these technologies. Either will give you a 50% charge in 30 minutes or less. Pair our adaptive chargers with one of our cables to bring the fastest speeds on the market to your customers.

Look for these symbols: **PD** & **QC** throughout the catalog.

CAR CHARGERS

Not all output from a USB Car Charger is the same. Standard 5W chargers provide around 1-3.1 Amps and this works great for one smart phone or small accessory. However, newer devices including tablets and gaming devices, can consume more power than this while charging. ZGEAR® High Power Car Chargers are capable of providing fast and powerful charging speeds to these products and more. Both QuickCharge and Power Delivery provide Adaptive Fast Charging. This enables a much faster charge to be obtained, while maintaining the long term performance of the battery in the device.

We utilize the latest technology in protection against power overloads and voltage surges. Our products are designed to be fire-safe and contain fusible resistors to absorb dangerous shorting incidents. Each of our chargers are tested at 3 stages during assembly and then tested for utmost performance at the end. Like all NWE Brands products, this quality standard also combats issues in our category such as e-waste, by providing quality electronics that last.

45 Watt Adaptive Fast Charge USB-A & USB-C Port Charger

- Power Delivery port will charge at 5V-9V/3A,12V/2.25A (27W Max).
- Quick Charge 3.0 USB port will charge at 3.6V-6.5V/3A, 6.5V-9V/2A,9V-12V/1.5A (18W Max).
- Blue LED indicates normal QC 3.0 charging (2.4A), orange LED indicates quick charge mode.
- Compatible with most vehicle 12V/24V accessory sockets.

| TYPE | TECH | POWER | MODEL |
|---------------|--------------|----------|--------------|
| USB-A & USB-C | QC PD | 45 Watts | PC-UCP27UAQ3 |

20 Watt Adaptive Fast Charger with USB-A & USB-C Ports

Adaptive Fast Charging will determine and supply the fastest possible charge the device will allow. Preserves battery life with overheat protection, short circuit prevention, and other advanced safety features that keep you and your devices safe.

- USB-C port offers up to 20 watts output for charging, which is up to 80% faster than standard 5 watt chargers.
- Power Delivery port will charge at 20W, 5V/3A, 9V/2.22A, 12V/1.67A.
- Dual ports allow for 2 devices to be charged in the car at once
- Compatible with most vehicle 12V/24V accessory sockets.

| TYPE | TECH | POWER | MODEL |
|---------------|-----------|----------|--------------|
| USB-A & USB-C | PD | 20 Watts | PC-UCP20UAzp |

20 Watt Adaptive Fast Charge USB-C Car Charger

- USB-C port offers up to 20 watts output for charging, which is up to 80% faster than standard 5 watt chargers.
- Power Delivery port will charge at 20W, 5V/3A, 9V/2.22A, 12V/1.67A.
- Compatible with most vehicle 12V/24V accessory sockets.

| TYPE | TECH | POWER | MODEL |
|-------|---|----------|----------|
| USB-C |  | 20 Watts | PC-UCP20 |

33.8 Watt Adaptive Fast Charge with Two USB-A Ports

Qualcomm Quick Charge 3.0 technology, up to 3 Amps of power to charge smart phones or tablets, reducing charge time by up to 80% compared to conventional chargers. Auto-detects your device to deliver the fastest possible charging method between QC3.0 charging mode and regular charging mode.

- USB 1 port will charge at 5V/1Amps = 5 Watts.
- USB 2 port Quick 3.0 mode will charge at 6.5V/3Amps, 9V/2.4 Amps, and 12V/2.4 Amps = 28.8 Watts.

- USB 1 never stops output when the USB 2 port is in Quick 3.0 charge mode. USB 2 is in normal charge mode (2.4A) when the charge light is blue. USB 2 is in Quick 3.0 charge mode when the charge light is orange.
- Compatible with most vehicle 12V/24V accessory sockets.

| TYPE | TECH | POWER | MODEL |
|-------|---|------------|--------------|
| USB-A |  | 33.8 Watts | PC-USBDO3AQ3 |

22 Watt Three Port USB-A Fast Charge Car Charger

- Charges three USB devices at one time.
- Total current is up to 22 watts (4.4 amps) between charging ports.
- Ports 1 or 2: 12 Watts shared output when using one of the USB ports. 5 Watts output when using both shared USB ports simultaneously .
- Port 3: Dedicated 12 watts (2.4 amp) USB port provides quick charging for your tablet.
- LED light indicates charger is operational.
- Compatible with most vehicle 12V/24V accessory sockets.

| TYPE | POWER | MODEL |
|-------|----------|------------|
| USB-A | 22 Watts | PC-USBT04A |

24 Watt, Fast Charge, Dual Port Car Charger

- This product has overheat protection, short circuit prevention, and other safety features that keep you and your devices safe.
- 24 Watts (4.8 Amps) of power shared between charging ports.
- Works with most vehicle 12V/24V accessory sockets.
- Compatible with most smart phones and other USB devices.

| TYPE | POWER | MODEL |
|-------|----------|-------------|
| USB-A | 24 Watts | PC-USBDO48A |

12 Watt Fast Charge Dual USB Port Car Charger

- Total current is up to 12 Watts (2.4 Amps) between charging ports.
- Charges two devices at the same time.
- Compatible with most vehicle 12 Volt/24 Volt accessory sockets.
- Works with many devices using a USB connector.
- This product has overheat protection, short circuit prevention, and other safety features that keep you and your device safe.

| TYPE | POWER | COLOR | MODEL |

WIRELESS CHARGING

The advantage to wireless charging is that it's a quicker, easier and more contained system to give power to a device on the go, or placed at your side. There are various standards for wireless charging. The most popular are Qi and Power Delivery. Apple has included a wireless charging integration on their iPhones since iPhone 8, and Samsung introduced wireless charging in their phones beginning with the S6. More recently, OnePlus, Motorola and Huawei have all included wireless charging in their handsets.

We offer wireless charging for these products in stand and mount configurations, Magnetic Align charging attachments, and more. Our Magnetic Align wireless charging devices aid with the alignment of the charger with the device, providing a more precise connection and charge.

Adaptive Wireless Charger with Magnetic Alignment

- Perfectly snaps and centers to the charging coil on the back of a iPhone 12, or newer, for secure wireless charging.
- Slim and lightweight design makes it effortless to grip in one hand.
- Built-in smart circuitry protects your device from over-charging.
- For optimal charging, pair with a USB-C power adapter with a minimum of 20W of power (sold separately).
- Wireless charging works with Apple®, Samsung®, Google® and other Qi wireless enabled devices.
- Metal ring included for use with all non-iPhone devices with wireless charging capability that don't support magnetic function.

| TYPE | POWER | MODEL |
|-------------|----------|------------|
| Qi-Wireless | 15 Watts | WC-WCMS15W |

Magnetic Align Wireless Charging Slim Power Bank

- Perfectly snaps and centers to the charging coil on the back of a iPhone 12, or newer, for secure wireless charging.
- Metal ring included for use with all non-iPhone devices with wireless charging capability, but doesn't support magnetic function.
- Wireless charging works with Apple®, Samsung®, Google®, and other Qi wireless enabled devices. With a USB-C cable, charge your device like you would with any traditional power bank.
- 5000 mAh — Comes factory pre-charged (18.5Wh)
- Built-in smart circuitry protects your device from over-charging.
- Designed with folding stand. Watch videos while charging.

| mAh | TYPE | POWER | MODEL |

WALL CHARGERS

Standard 5W chargers provide around 1-3.1 Amps and this works great for one smart phone or small accessory. However, newer devices including tablets and gaming devices, can consume more power than this while charging. ZGEAR® High Power Wall Chargers are capable of providing fast and powerful charging speeds to these products and more. Both QuickCharge and Power Delivery provide Adaptive Fast Charging. This enables a much faster charge to be obtained, while maintaining the long term performance of the battery in the device. Our wide range of offerings include plenty of multiport configurations to give maximum power to the multiple devices in a modern, wireless household.

We utilize the latest technology in protection against power overloads and voltage surges. Our products are designed to be fire-safe and contain fusible resistors to absorb dangerous shorting incidents. Each of our chargers are tested at 3 stages during assembly and then tested for utmost performance at the end. Like all NWE Brands products, this quality standard also combats issues in our category such as e-waste, by providing quality electronics that last.

3 Outlet AC Power Cube with USB-A & USB-C Fast Charge

- Stylish and compact, this Power Cube provides easy access from hard to reach areas. Use with computers, lamps, and to charge mobile phones or tablets; reduces clutter and is great for all-in-1 travel convenience.
- 2-in-1 AC power extender is perfect for spaces with limited outlets and charging areas, such as hotels or dorm rooms.
- 18 Watt Quick Charge USB-A port and Power Delivery USB-C port supported by Smart Charge IC technology. Power adjusts to fastest optimal rate for each device.
- Flat AC plug fits close against the wall and easily hides behind furniture. 3 prong, grounded power connector for safety and is contained in a fire-safe casing. 5.25 Foot cord.

CHARGING KITS

As a power products company, we of course offer Cable and Charger kits to meet modern consumer needs. We offer these kits in Power Delivery enabled, Fast Charge styles to provide the best charging system to modern smart phones, tablets, wireless gaming devices and more. We also offer the kits in standard power configurations for a value that makes high quality charging accessible to all.

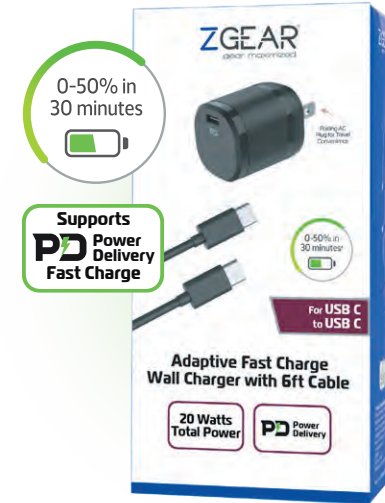

We utilize the latest technology in protection against power overloads and voltage surges. Our products are designed to be fire-safe and contain fusible resistors to absorb dangerous shorting incidents. Each of our chargers are tested at 3 during assembly and then tested for utmost performance at the end. Like all NWE Brands products, this quality standard also combats issues in our category such as e-waste, by providing quality electronics that last.

Adaptive Fast Charge Wall Charger with 6ft Cable

Adaptive Fast Charging will determine fastest possible charge the device will allow. Preserves battery life with overheat protection, short circuit prevention, and other advanced safety features that keep your devices safe.

- USB-C port offers up to 20 watts output for charging, which is up to 80% faster than standard 5 watt chargers.
- USB-C to USB-C/Apple® Lightning® allows up to 60 watts of power transfer.
- PD port will charge at 20W, 5V/3A, 9V/2.22A, 12V/1.67A.
- Universal power input (100-240V, 50-60Hz) World travel compatible, no converter needed.

POWER BANKS

Unlike wall and car chargers, Power Banks are run with battery power and measured by Milliamps. 2600 mAhs will provide power to any device when it is needed in a pinch — for instance — and our products run up to 20,000 mAh which can help weather a storm when a full power charges are needed for multiple devices, a few times over. We also offer a solar-powered power bank that makes for a great offering for outdoor enthusiasts, and a 2-in-1 style that features a detachable dual USB wall charger!

Ultra High Capacity Power Bank with LCD Display

- Up to 10 full charges for most smart phones.
- Two USB outlets, compatible with nearly any device that charges with USB.
- Four LCD battery status indicator.

| mAh | POWER | MODEL |
|-------|----------|----------------|
| 20000 | 24 Watts | PB-USB20KCD48A |

2-in-1 Power Bank with Detachable Dual Port Wall Charger

Take the reliability of a wall charger and convenience of a power bank with you. Never worry about power again.

Wall Charger

- 2 USB ports can charge 2 devices at the same time.
- Micro USB cable included.
- Built-in smart circuitry protects your device from over-charging.

Power Bank

- 5 full charges for smart phones, varies by device (Avg. 2000 mAh).
- Comes factory pre-charged for immediate use.
- Over-charge and over-discharge protection.

PROTECTORS & CASES

Smart phones are only increasing in value. Protect your precious screen with one of our extremely tough and thin tempered glass screen protectors. We also offer a universal, protective film option that can be trimmed to fit a specific device.

ZGEAR® also features a line of phone cases. Save devices from bumps and bruises with one of our case options. Plus, get out and get moving with our activity armband.

Tempered Glass

- 9H hardness repels heavy blows and resists scratches from sharp items.
- Thinner than a credit card, superior companion to fitted cases.
- Crystal clear—99% transparent, provides accurate color and optical quality brightness.
- Smooth surface preserves the sensitivity of your original screen.
- Oleophobic and hydrophobic surface coating reduces smudges, and cleans easily.

MOUNTS & STANDS

Choosing a smart phone mount for a car is simultaneously easy and difficult, depending on the interior setup of the vehicle. Mounts tend to fall into a couple categories; those that attach to air vents and those that stick to surfaces like dashboards or windshields. There is also the need to choose the way the mount will hold a device. We offer magnetic, gravity, or spring loaded expandable jaw mounts to hold devices tight.

High quality audio is needed everywhere these days. Let us help with that. We offer solutions to connect Wireless audio within vehicles, adapt headsets to device ports and more.

Other ZGEAR® accessories offered include kits to help produce streaming content, and to keep valuables such as cameras clean and like new.

Qi-Compatible Wireless Magnetic Phone Mount

- Compatible with most devices using Qi technology.
- Transfer a faster charge to your device when used with the included high power car charger.
- 10 Watts (2 Amps) output up to 50% faster charging than 5 watt 1 amp charger.
- Strong mount attaches to flat surfaces, such as car windshield, dashboard or other smooth surfaces.
- The reinforced magnetic holder produces an intense force of attraction that will hold most smart phones.

| TYPE | POWER | ADJUSTMENT | MODEL |
